

The Advisors' Inner Circle Fund

WESTWOOD
HOLDINGS GROUP, INC.®

Westwood Income Opportunity Fund

Summary Prospectus | March 1, 2016

Ticker: Institutional Shares — WHGIX

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.westwoodfunds.com/literature/RegulatoryDocuments.aspx>. You can also get this information at no cost by calling 1-877-386-3944, by sending an e-mail request to westwoodfunds@seic.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated March 1, 2016, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

FUND INVESTMENT OBJECTIVES

The primary investment objective of the Westwood Income Opportunity Fund (the "Fund") is to provide current income. A secondary objective of the Fund is to provide the opportunity for long-term capital appreciation.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold Institutional Shares of the Fund.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Institutional Shares
Management Fees	0.75%
Other Expenses	0.09%
Acquired Fund Fees and Expenses	0.06%
Total Annual Fund Operating Expenses ^{1,2}	0.90%

- ¹ The Total Annual Fund Operating Expenses in this fee table do not correlate to the expense ratio in the Fund's Financial Highlights because the Financial Highlights include only the direct operating expenses incurred by the Fund, and exclude Acquired Fund Fees and Expenses.
- ² Westwood Management Corp. (the "Adviser") has contractually agreed to reduce fees and reimburse expenses in order to keep Total Annual Fund Operating Expenses for Institutional Shares (excluding interest, taxes, brokerage commissions, Acquired Fund Fees and Expenses, and extraordinary expenses (collectively, "excluded expenses")) from exceeding 0.90% of the Fund's Institutional Shares' average daily net assets until February 28, 2017. In addition, if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the expense cap, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the expense cap to recover all or a portion of its prior fee reductions or expense reimbursements made during the preceding three-year period during which this Agreement (or any prior agreement) was in place. This Agreement may be terminated: (i) by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund (the "Trust"), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2017.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$92	\$287	\$498	\$1,108

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund's performance. During its most recent fiscal year, the Fund's portfolio turnover rate was 24% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Under normal circumstances, the Fund seeks to meet its investment objectives by investing generally more than 80% of its net assets, plus any borrowings for investment purposes, in dividend-paying and/or interest-bearing securities. By utilizing income-producing securities from diverse asset classes, the Fund also seeks to maintain a lower volatility profile than traditional equity-only products. The Fund aims to invest in securities of companies with a strong and improving cash flow sufficient to support a sustainable or rising income stream for investors. In selecting securities for the Fund, the Adviser chooses among a diversified group of income-producing asset classes. Equity securities may include dividend-paying common stocks, preferred stocks, convertible securities and warrants. Fixed income securities may include bonds and other debt securities, and money market instruments. Other types of income-producing securities may include interests in royalty trusts and master limited partnerships (“MLPs”), securities of real estate investment trusts (“REITs”), and shares of exchange-traded funds (“ETFs”). The Fund generally invests in securities of domestic companies, but may also invest in securities of foreign companies and American Depositary Receipts (“ADRs”). In the event the Fund invests in foreign securities and ADRs, the Adviser expects that the Fund’s investments in such securities would normally represent less than 25% of the Fund’s assets.

The Fund is permitted to invest in companies of any capitalization range. The Fund’s fixed income investments are, in the aggregate, of investment grade (i.e., those rated in one of the three highest rating categories by a rating agency), but may at times include securities rated below investment grade (high yield or “junk” bonds). In addition, the Fund’s fixed income securities may include unrated securities, if deemed by the Adviser to be of comparable quality to investment grade.

The Fund seeks to provide a higher level of current income than that offered by traditional fixed income products such as U.S. government bonds and money market securities. The Adviser’s investment process incorporates relative value analysis among capital instruments, as well as among asset classes, to determine where downside potential can be limited to achieve the goal of generating an attractive level of current income along with capital appreciation. Key metrics for evaluating the risk/return profile of an investment may include strong free cash flow, an improving return on equity, a strengthening balance sheet and, in the case of common equities, positive earnings surprises without a

corresponding change in the stock price. The Adviser has disciplines in place that serve as sell signals, such as a security reaching a predetermined price target, a change to a company's fundamentals that make the risk/return profile unattractive, or a need to improve the overall risk/return profile of the Fund.

PRINCIPAL RISKS

As with all mutual funds, a shareholder is subject to the risk that his or her investment could lose money. **A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Equity Risk – Since it purchases equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund's equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

Fixed Income Risk – The prices of the Fund's fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers. Generally, the Fund's fixed income securities will decrease in value if interest rates rise and vice versa, and the volatility of lower-rated securities is even greater than that of higher-rated securities. Also, longer-term securities are generally more volatile, so the average maturity or duration of these securities affects risk. Credit risk is the possibility that an issuer will fail to make timely payments of interest or principal or go bankrupt. The lower the ratings of such debt securities, the greater their risks. In addition, these risks are often magnified for securities rated below investment grade, often referred to as "junk bonds," and adverse changes in economic conditions or market perception are likely to cause issuers of these securities to be unable to meet their obligations to repay principal and interest to investors.

High Yield Bond Risk – High yield bonds (often called "junk bonds") are debt securities rated below investment grade. Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than

investment-grade securities. Companies issuing high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.

Small- and Mid-Capitalization Company Risk – The small- and mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, these small- and mid-sized companies may pose additional risks, including liquidity risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small- and mid-cap stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange.

Micro-Capitalization Company Risk – Micro-capitalization companies may be newly formed or in the early stages of development with limited product lines, markets or financial resources. Therefore, micro-capitalization companies may be less financially secure than large-, mid- and small-capitalization companies and may be more vulnerable to key personnel losses due to reliance on a smaller number of management personnel. In addition, there may be less public information available about these companies. Micro-cap stock prices may be more volatile than large-, mid- and small-capitalization companies and such stocks may be more thinly traded and thus difficult for the Fund to buy and sell in the market.

REIT Risk – REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: declines in property values; increases in property taxes, operating expenses, interest rates or competition; overbuilding; zoning changes; and losses from casualty or condemnation. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this Prospectus.

Royalty Trust Risk – The Fund may invest in royalty trusts. A royalty trust generally acquires an interest in natural resource companies and distributes the income it receives to the investors of the royalty trust. A sustained decline in demand for crude oil, natural gas and refined

petroleum products could adversely affect income and royalty trust revenues and cash flows. Factors that could lead to a decrease in market demand include a recession or other adverse economic conditions, an increase in the market price of the underlying commodity, higher taxes or other regulatory actions that increase costs, or a shift in consumer demand for such products. A rising interest rate environment could adversely impact the performance of royalty trusts. Rising interest rates could limit the capital appreciation of royalty trusts because of the increased availability of alternative investments at more competitive yields. The Fund's investment in royalty trusts may result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the royalty trusts' operating expenses, in addition to paying Fund expenses. Royalty trust operating expenses are not reflected in the fee table and example in the Prospectus.

MLP Risk – MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in an MLP also include those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded to investors in a MLP than investors in a corporation. For example, investors in MLPs may have limited voting rights or be liable under certain circumstances for amounts greater than the amount of their investment. In addition, MLPs may be subject to state taxation in certain jurisdictions which will have the effect of reducing the amount of income paid by the MLP to its investors.

Foreign Company Risk – Investing in foreign companies, including direct investments and through ADRs, which are traded on U.S. exchanges and represent an ownership interest in a foreign security, poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. In addition, investments in foreign companies are generally denominated in a foreign currency. As a result, changes in the value of those currencies compared to the U.S. dollar may affect (positively or negatively) the value of the Fund's investments. These currency movements may occur separately

from, and in response to, events that do not otherwise affect the value of the security in the issuer's home country. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers. While ADRs provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

Foreign Currency Risk – As a result of the Fund's investments in securities or other investments denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case, the dollar value of an investment in the Fund would be adversely affected.

ETF Risk – ETFs are pooled investment vehicles, such as registered investment companies and grantor trusts, whose shares are listed and traded on U.S. stock exchanges or otherwise traded in the over-the-counter market. To the extent that the Fund invests in ETFs, the Fund will be subject to substantially the same risks as those associated with the direct ownership of the securities comprising the index on which the ETF is based and the value of the Fund's investment will fluctuate in response to the performance of the underlying index. ETFs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in ETFs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the ETFs' operating expenses, in addition to paying Fund expenses. Because the value of ETF shares depends on the demand in the market, shares may trade at a discount or premium to their net asset value and the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, which could adversely affect the Fund's performance.

PERFORMANCE INFORMATION

The bar chart and the performance table below illustrate the risks and volatility of an investment in Institutional Shares of the Fund by showing changes in the Fund's Institutional Shares' performance from year to year and by showing how the Fund's Institutional Shares' average annual returns for 1, 5 and 10 years and since inception compare with those of a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.westwoodfunds.com or by calling 1-877-FUND-WHG (1-877-386-3944).

Average Annual Total Returns for Periods Ended December 31, 2015

This table compares the Fund's Institutional Shares' average annual total returns for the periods ended December 31, 2015 to those of appropriate broad-based indices.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Returns after taxes on distributions and sale of Fund shares may be higher than before-tax returns when a net capital loss occurs upon the redemption of Fund shares.

Westwood Income Opportunity Fund – Institutional	1 Year	5 Years	10 Years	Since Inception (12/19/05)
Fund Returns Before Taxes	(2.57)%	7.07%	6.84%	6.75%
Fund Returns After Taxes on Distributions	(3.19)%	6.49%	5.98%	5.88%
Fund Returns After Taxes on Distributions and Sale of Fund Shares	(1.41)%	5.44%	5.26%	5.17%
Citigroup 10-Year Treasury Index (reflects no deduction for fees, expenses or taxes)	0.90%	4.65%	5.05%	5.09%
Citigroup 3-Month Treasury Bill Index (reflects no deduction for fees, expenses or taxes)	0.03%	0.05%	1.17%	1.17%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	1.38%	12.57%	7.31%	7.19%
FTSE NAREIT U.S. Equity Index (reflects no deduction for fees, expenses, or taxes)	2.83%	11.91%	7.38%	7.38%
25/25/25/25 Blended Benchmark Index (reflects no deduction for fees, expenses or taxes)	1.61%	7.52%	5.98%	5.96%

INVESTMENT ADVISER

Westwood Management Corp.

PORTFOLIO MANAGERS

Mr. Mark R. Freeman, CFA, Chief Investment Officer, has managed the Fund since its inception in 2005.

Mr. Todd L. Williams, CFA, Senior Vice President, Senior Research Analyst, has managed the Fund since its inception in 2005.

PURCHASE AND SALE OF FUND SHARES

To purchase shares of the Fund for the first time, you must invest at least \$100,000. There is no minimum for subsequent investments.

If you own your shares directly, you may redeem your shares on any day that the New York Stock Exchange is open for business by contacting the Fund directly by mail at Westwood Funds, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: Westwood Funds, c/o DST Systems, Inc., 430 West 7th Street, Kansas City, MO 64105) or telephone at 1-877-FUND-WHG (1-877-386-3944).

If you own your shares through an account with a broker or other institution, contact that broker or institution to redeem your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Fund.

TAX INFORMATION

The Fund intends to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account ("IRA"), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
